John Kantz

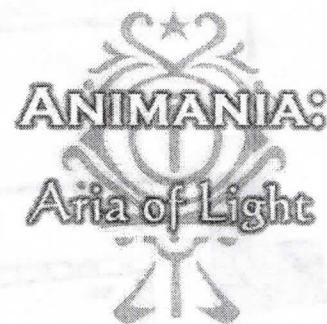

NEW PANEL INFO:

"Make Your Own Anime Movie"
Panel Discussion (2 hrs)

The creators of "The Nine" (www.whoarethenine.com) will cover a groundbreaking new way to produce an animated feature using common software: Photoshop, Flash, QuickTime and a few others - so that anyone can produce their own movie. They will show a sample animation technique from start to finish to demonstrate their method and take questions on how it can be applied to a project you may want to do. Also covered will be: the essentials of storytelling, promotion, and animation in general.

CHARITY AUCTION:

This year's A-Kon Charity is the American Cancer Society, in honor of those staff members who have been diagnosed with cancer in the last year. Auctioneers will be Helen McCarthy and Lee Martindale. Special Donated Items, including some exclusive items from the Japanese guests, will be on display at the convention. Ask Info Desk for more details.

L.I.F.E. LARP

Be prepared to embark on a journey of self-discovery and spiritual salvation, in an adventure that will bring you back to your very roots. **It's the year 2053** and most of the world has been ravaged by the nuclear war of half a century past. Only one world government exists, and the majority of citizens spend their youths training in special "Academies" designed to turn out special "Guardians" meant to protect the human populace from mutations that arose after the nuclear holocaust. In order to promote the strongest schools, the world government has sanctioned School vs. School invasions, where one school would invade another and compete in cut-throat tournament style games. The winner Academy would then assimilate the loser, thus ensuring the survival of the human race.

KAOS ROOM PROGRAMMING

Quake 3
Unreal Tournament
Return to Castle Wolfenstein
Serious Sam 2
Counter Strike
